Greetings'

I am receiving telephone calls and mail from debt collectors alleging that V ██████████ B ██████████ owes the Corporation of the County of Northumberland a debt.

This must be a mistake as I, for the time being located at ██████████ ██████████ have never used or authorized my personal name of my head or hand for business or commercial or public purposes or purposes of trade.

Not that I would authorize my personal name for such purposes but if I was to do such, rest assured, as I am not born with money and would have to spend time and energy like everyone else to get it, the user(s) or beneficiary(s) would have to pay at least as much to me as they intend to gain from me.

No sense in me trying to convince you of anything but I believe you can, and it may be in the interest of the County, the police, the Justices of the Peace and the prosecutors et al – to trace the source (paper trail) of the name V ██████████ B ██████████ in the County records to its origin.

That name not this man was registered by the government and you will find that I played no part in the registration.

I honestly do not know who the donee is of that name or for whose benefit it was secured by registration.

As only the registrant can help you and since the County is making a claim that is affecting me, a man, I ask that the County contact the registrant before proceeding further on the basis that I am that person or the debt is my debt.

I appreciate you looking into this and to receive the results of your findings signed by a duly authorized officer of the County.

The name I use here for you to respond to is my personal name so I appreciate you not confusing it with that other name and I am not authorizing my private name for any other use or purpose.

I thank you in advance.
